

Senior Design Project Judging Criteria			
(Only projects selected by instructors and the Director of the Learning Factory will be considered for these awards)			
Judge: _____			
Project Judging Categories		Max. Points	Actual Points
(Rated by Interviewing Industry Teams)			
Technical Content	Did the team approach the problem in a way that is consistent with the disciplinary expertise of its members?	5	
(0 to 15 points)	Was appropriate modeling, analysis, and/or testing used to help identify and refine solutions?	5	
	Was the team creative in their solution and/or approach to the problem?	5	
Customer Satisfaction	Does the project solution directly address the customer's stated objectives (is the solution appropriate)?	5	
(0 to 15 points)	Does the project solution meet/exceed customer's expectations (is the customer satisfied)?	5	
	Did the team demonstrate improvements in product/process quality or cost/time savings?	5	
Project Management	Is there evidence of strong teamwork and good communication among team members?	5	
(0 to 10 points)	Did the team acknowledge and stay within design constraints (e.g., budget, schedule, cost)?	5	
Oral Presentation & Display	Did the oral presentation clearly convey the necessary background, approach, results, and recommendations?	5	
(0 to 10 points)	Did the team's display (poster, simulation, prototype, etc.) clearly describe the technical project and solution?	5	
Intangibles	Other noteworthy aspects not covered above that add value to the project quality and/or completeness?	5	
(0 to 5 points)	(e.g., level of difficulty of project, new technology and/or innovative process or product, cool, etc.)
